

JOHN SMITH

Software Engineer

Email: john.smith@email.com | Phone: (555) 123-4567

LinkedIn: linkedin.com/in/johnsmith | Portfolio: johnsmith.dev

Address: 123 Main Street, Seattle, WA 98101

PROFESSIONAL SUMMARY

Experienced software engineer with 4+ years developing scalable cloud applications.

Expertise in AWS services, microservices architecture, and full-stack development.

EDUCATION

Bachelor of Science in Computer Science

University of Washington, Seattle, WA

Graduated: June 2020 | GPA: 3.8 | Magna Cum Laude

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Systems

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Tech Corp | Seattle, WA | January 2022 - Present

- Lead development of cloud-native applications using AWS services
- Reduced system latency by 40% through performance optimization
- Led team of 5 engineers on microservices migration project
- Implemented CI/CD pipeline reducing deployment time by 60%
- Technologies: Python, AWS, Docker, Kubernetes, PostgreSQL

Software Engineer | StartupXYZ | San Francisco, CA | July 2020 - December 2021

- Developed full-stack web applications for e-commerce platform
- Built payment processing system handling \$1M+ in monthly transactions
- Improved application performance by 50% through code optimization
- Technologies: JavaScript, React, Node.js, MongoDB

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, Go, SQL

Cloud Platforms: AWS, Azure, Google Cloud Platform

Frameworks: React, Django, Flask, Express.js

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

DevOps: Docker, Kubernetes, Jenkins, Terraform, Git

SOFT SKILLS

Leadership, Team Collaboration, Problem Solving, Communication, Project Management

LANGUAGES

English (Native), Spanish (Conversational)

CERTIFICATIONS

- AWS Solutions Architect Associate (March 2021 - March 2024) | Credential: AWS-SAA-123456
- Certified Kubernetes Administrator (January 2022 - January 2025) | Credential: CKA-789012

PROJECTS

E-commerce Analytics Platform | June 2023

Built real-time analytics dashboard for e-commerce data using AWS services

Technologies: Python, AWS Lambda, DynamoDB, React

GitHub: github.com/johnsmith/ecommerce-analytics

Task Management API | December 2022

RESTful API for task management with authentication and real-time updates
Technologies: Node.js, Express, PostgreSQL, Socket.io
GitHub: github.com/johnsmith/task-api
